India's Most ECO- Friendly Gloves

**GUIDE TO UNDERSTANDING  
COMPOSTABLE GLOVES**

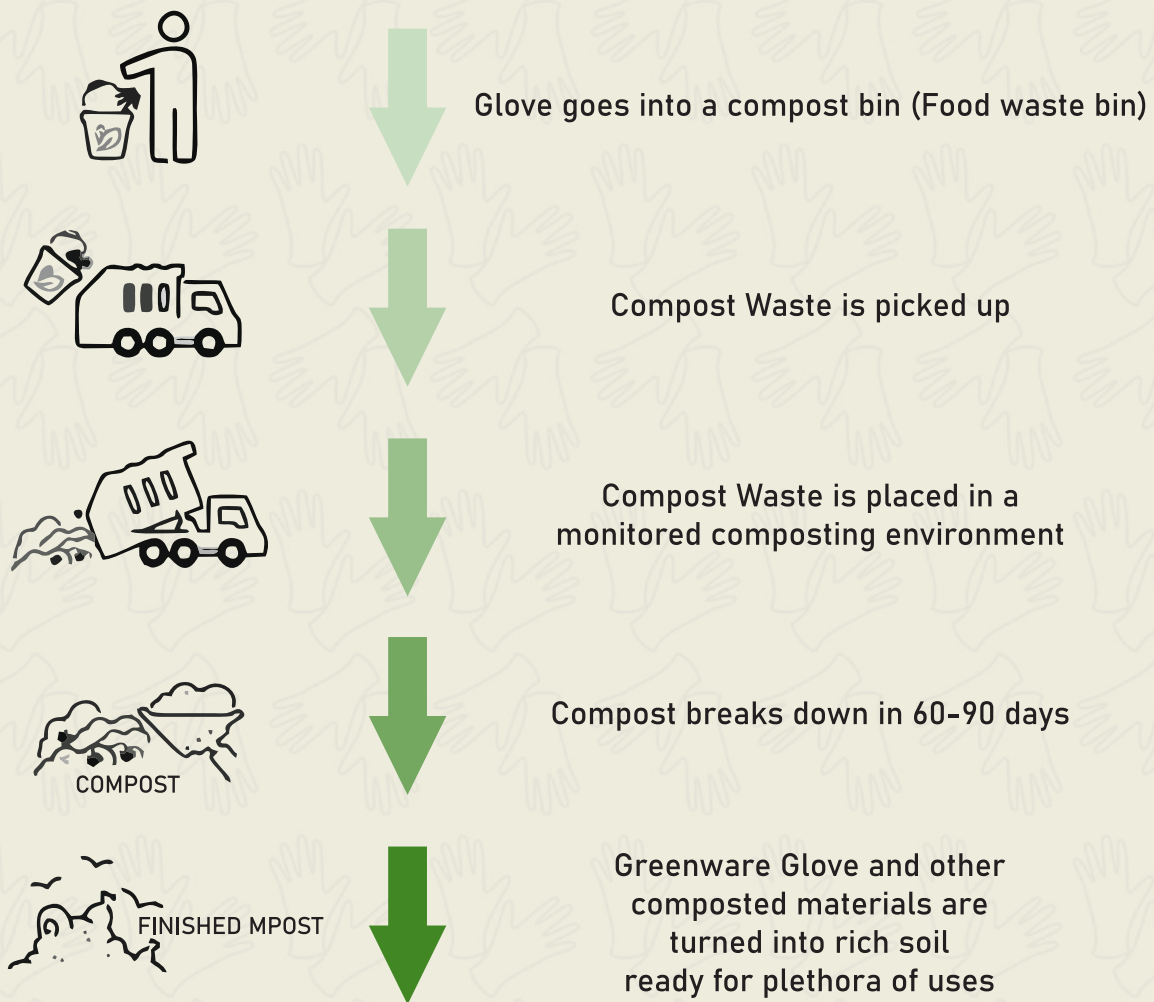

# GUIDE TO UNDERSTANDING COMPOSTABLE GLOVES

Plastic pollution is a menace and we need to stand up against it. No doubt, India is taking some efforts to recycle but unfortunately, these current effort are not enough to offset the growing amount of waste being produced. With no increased effort, this plastic waste is expected to triple by 2060.

Thus, even small eco-friendly changes too can make big waves. And this is where compostable gloves come in !

## What are Compostable Gloves ?

### THE RESULT

Greenware Glove and other composted materials are turned into rich soil ready for a plethora of uses

# Where can you use Compostable Gloves ?

## GENERAL PPE

## FOOD PREPARATION

## FOOD SERVICE

## HOSPITALITY & SERVICE SECTOR

## CLEANING

# Why Switch to Compostable Gloves?

## The Key Benefits for Homes & Business

### HEALTH AND SAFETY

Compostable gloves are as durable as any commercial gloves on the market, so you're not giving up quality or safety when you make the switch.

Business especially those in the food service industry, are recommended by the FDA to wear gloves when serving customers, Compostable gloves can help businesses meet the health and safety standards set by ruling bodies and even help their bottom line in the long run.

### ECO-FRIENDLY

Plastic/Rubber takes hundreds of years to biodegrade & also emit greenhouse gases on exposure to sunlight. By using a truly compostable glove like Greenware, you are contributing to the safe care of mother nature.

### REGULATORY COMPLIANCE

With compostable gloves, one can be hassle free in complying with Pollution Control Board guidelines. Further using Compostable gloves will give a boost to CSR activities.

### ADVOCACY

Today, a growing number of customers are favoring business that make efforts to advocate sustainability & protect the environment. Switching to Compostable gloves is a simple and visible way to demonstrate that you're not just a company that talks about eco-friendly practices but applies them as well.

**Looks like Plastic ,**

**Feels like Plastic**

**But does not take 100 years to degrade..**
