# GREENWARE

Leading Indian manufacturer of sustainable products and solutions for the circular economy.

The transition from plastic to plant-based plastic was a natural course of action. we now invest heavily in the latest technologies and place our bets at the forefront of R&D alliance to help close.

We are a pioneer in the bio-based production, with unique formulations to fit even the most exigent needs. Together with our partners, both retailers and sustainable brands, we are constantly developing products that respond to the needs of the changing society.

# GREENWARE

**Looks like Plastic ,  
Feels like Plastic**  
**But does not take 100 years to degrade..**

### BENEFITS OF USING COMPOSTABLE PRODUCTS

-  100% ecofriendly & biodegradable
-  Produced from renewable raw materials
-  1kg compostable plastic produces 2.8kg less CO2 than regular polyethylene
-  Strong reduction of CO2 and the same mechanical properties as traditional polyethylene
-  Products are made from CO2 negative raw materials and can be disposed off easily without leaving any residue behind

# INNOVATION & SUSTAINABILITY PERFORMANCE
